Shanghai Telecom utilizes XXX's long haul Gigabit Ethernet technology to connect its regional data centers into a high-performance, cost-effective and reliable service backbone network. The complete XXX solution also includes sophisticated capabilities such as bandwidth control, service accounting and billing, and access control.

"China Telecom provides extensive communication services to 1.2 billion people in China. It requires networking equipment built for speed, operational reliability, scalability and cost-effectiveness," said Deputy General Manager xxx of YYY, a major information and networking system integrator in China. "We worked closely with XXX to provide Shanghai Telecom with a world class Internet Data Center solution with a total non-blocking architecture, ultra-high availability with extensive redundancy options, high performance Layer 2-7 switching, a rich capability set including adaptive rate limiting and wire speed access control list (ACL), as well as extensive local support services."

With XXX's high-performance networking solutions, Shanghai Telecom will be able to provide bandwidth-intensive, next-generation multimedia applications to its business enterprises, government agencies and home Internet users.

"Shanghai Telecom needed networking equipment that would meet the demands of its customers requiring various broadband services," said xxx, president and CEO of XXX. "XXX's world-class Internet data center and long haul Gigabit Ethernet Metro solutions provide a high-performance and scalable solution for communications service providers who want to cost-effectively deliver quality voice, data and Internet access services to their customers."

## Chinese:

上海电信运用 XXX 公司的长通信距离千兆以太网技术，将其区域数据中心连接到高性能、经济高效，以及可靠的服务主干网络中。XXX 公司的这一全套解决方案还包括一些高端的性能，如带宽控制、服务记账和计费，以及存取控制性能。

YYY 公司是中国一家主要的信息和联网系统集成商，该公司的副总经理xxx先生说道：“中国电信为中国 12 亿人口提供了广泛的通信服务。这就要求所构建的联网设备具备高速度、运行可靠性、可伸缩性和经济有效的特性。我们与 XXX 公司密切合作，向上海电信提供了世界级因特网数据中心解决方案，该解决方案不仅具有完全非阻塞的体系结构，而且具有带有广泛冗余选项的超级高可用性、高性能的第二至第七层交换，包括自适应性速率限制和线速存取控制列表（ACL）在内的丰富性能组，以及广泛的本地支持服务。”

拥有 XXX 公司高性能的联网解决方案，上海电信便能够向其商业企业、政府机构和家庭因特网用户提供带宽密集型、新一代的多媒体应用。

XXX网络公司总裁兼执行总裁xxx说：“上海电信需要能够满足其各种客户对不同带宽服务要求的联网设备。XXX 公司的世界级因特网数据中心和长通信距离千兆以太网城域解决方案为那些希望能经济有效地为其客户提供高质量语音、数据和因特网访问服务的通信服务供应商提供了高性能、可伸缩的解决方案。”
